

Approved tyres

In the spring of 2008 Porsche AG took 177 different tyre sets and tested them on all Porsche models up to and including the 993. The tables reflect the new tyre data and provide an updated set of tyre recommendations specifically for the 964 series. 18 inch and winter tyre data was compiled from existing TÜV/Porsche AG Herstellerbescheinigung documentation.

Approved summer tyres for narrow body normally aspirated 964 models.	
Manufacturer, model, N-rating (wheel size)	Remarks
Pirelli P-Zero Dir. N3 (6Jx16).	Very good in dry and wet conditions.
